

Future work on charges

SRoC Service Improvements

Permitting Ambitions for 18/19 and Beyond

- Pre-application and Permitting Helpdesks
- Dedicated Pre-application team in Sheffield
- Improved Engagement including sessions with defined customer groups
- Digital enhancements including application/customer systems and Robotic Automation
- New Ways of Working including Duly Making and Schedule 5

Drivers for change

- Requirement to meet MPM to fund current regulatory activities, and reduce use of government budget
- Efficiency savings, government transformation (policy and digital)
- New duties
- EU Exit
- 25 year Environment Plan
- Regulatory Futures
- Clean Growth and Industrial Strategy
- Resources and Waste Strategy

2018/19 charge proposals

- Consult Autumn 2018 for implementation of charge changes from April 2019
- Amendments to the EPR charges scheme
- RSR nuclear
- PCBs
- Navigation
- Abstraction Standard Unit Charge changes
- Terrestrial planning
- COMAH

Beyond 2018/19 – where we expect to need to review funding

- Mid term review of the SRoC – considering efficiencies, inflation and improvements to service
- Water Abstraction
- Developing a sustainable Navigation service
- Changes to chemicals as a result of EU Exit
- Enforcement – to ensure environment protection
- Incident management - to ensure environment protection
- Polluter pays, beneficiary pays
