Content

- Anticipated cycle
- Engagement principles
- Lessons learned
- Discussion and suggestions

Anticipated cycle

Engagement principles

- CRG for oversight, overall framework, process advice and early feedback
- Co-ordinated approach to process & timing
- Functional engagement on specific sectoral proposals
- No prescription - other than a formal written consultation prior to implementation.

Lessons Learned

- Greater change requires longer
- Early functional engagement useful
- Establish principles then agree detail
- Active participation & early feedback important
- Little contingency in timeline – rescheduling may be necessary for elections & purdah; extended incidents

Discussion and suggestions

- What worked well, what should we do more of?
- What was difficult, what should we avoid?
